> Hands-On Manufacturing Tips:

How to “Build-Up” Moldings to Create Larger Profiles

Get the “Colonial” look or a new “Contemporary” look by combining various standard molding patterns.

Ceilings

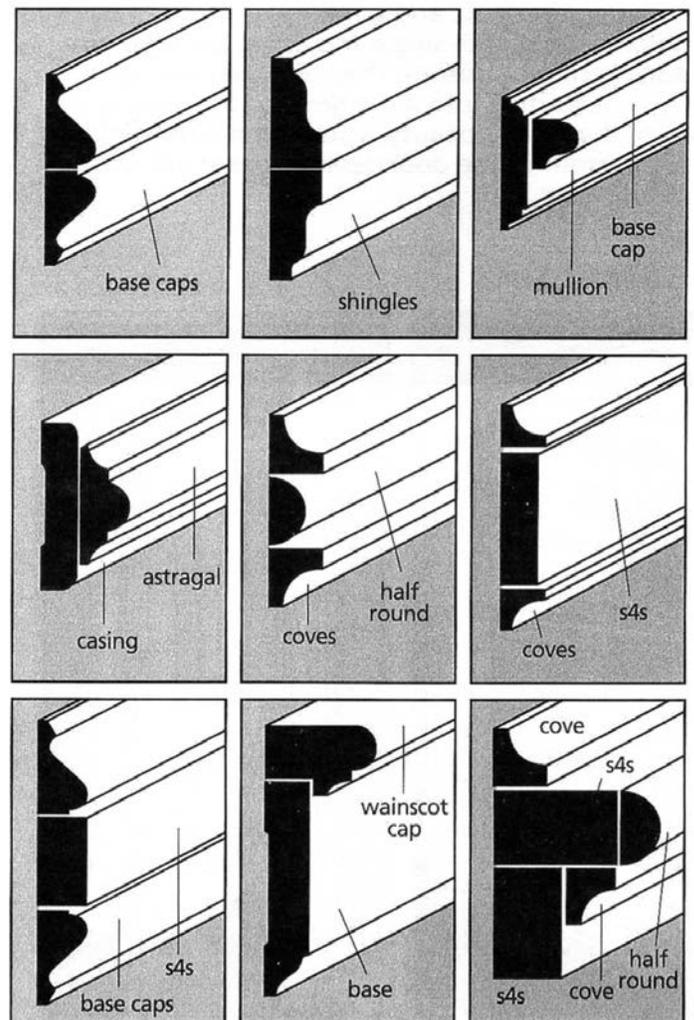

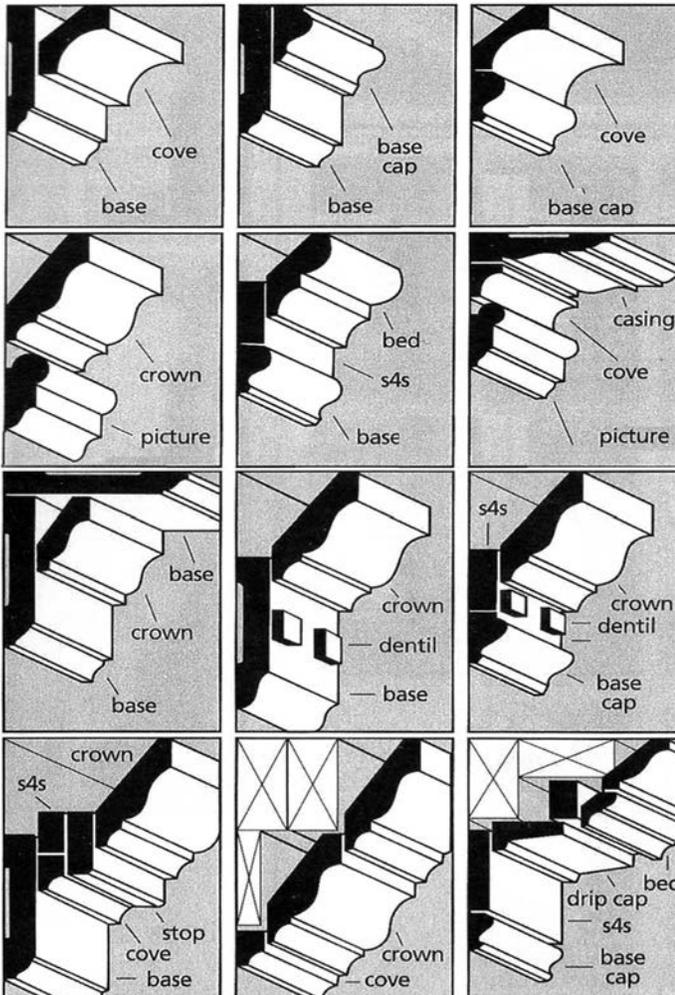

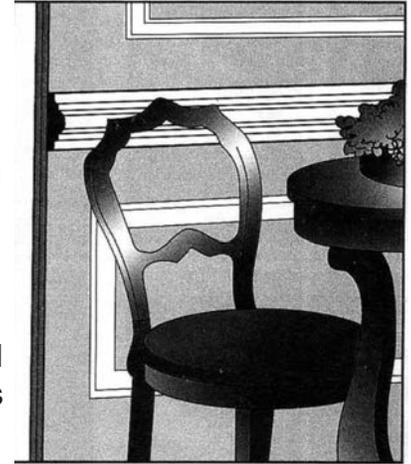

The most obvious area for “built-up” moldings is where the walls meet the ceiling. This is primarily true of rooms with high ceilings. However, in low-ceiling rooms (below 8 ft.), single molding profiles usually work best.

A series of “built-up” moldings can have a tendency to make a low ceiling appear even lower. But if your ceilings are high (10 ft. or higher), there is no limit to the rich 3-dimensional elegance you can add to the room’s appearance with the creative application of “built-up” moldings.

Following are several suggested combinations, but don’t be limited to these. Let your imagination create your own combinations and designs.

Chair Rails

Adding chair rails to a room is a very traditional method of visually breaking up walls, adding both interest and protection. It prevents the wall from being bumped or scuffed by chairs and can also be used to visually separate different types of decorating material such as paneling, wallpaper, and paint. Following are some variations of “built-up” chair rail profiles.

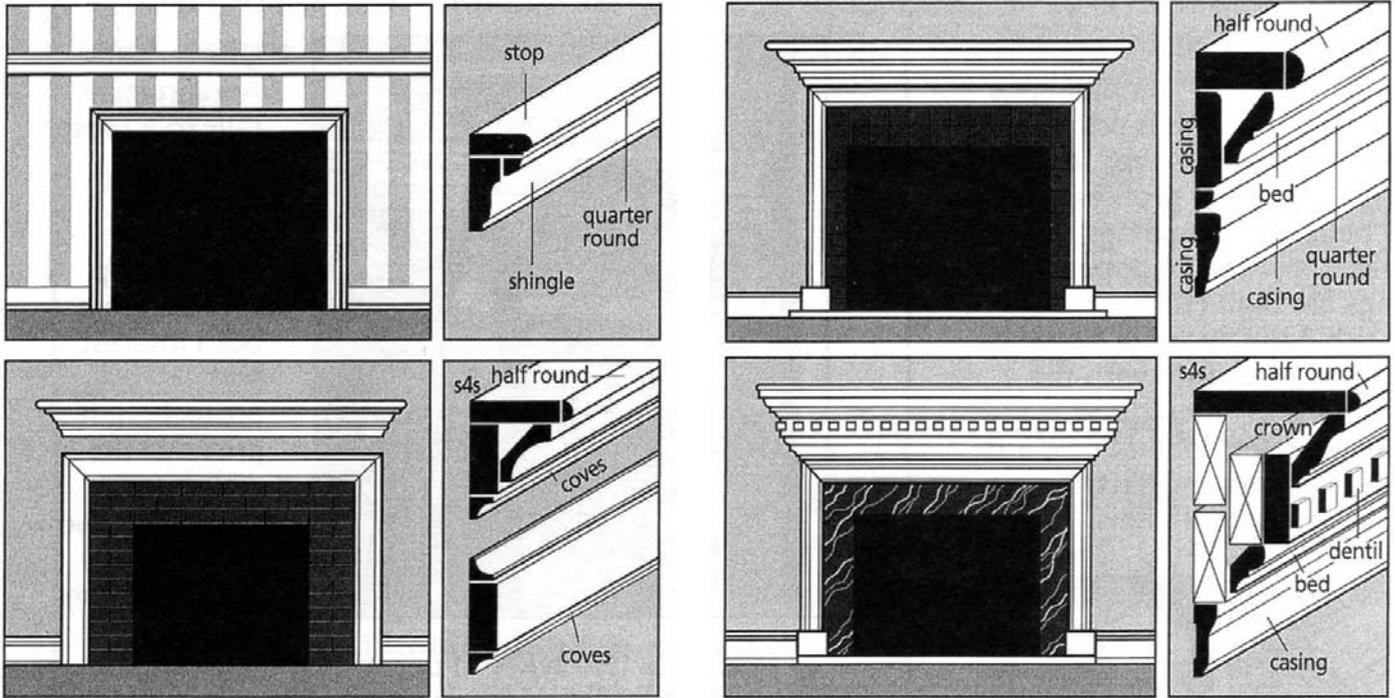

> *Hands-On Manufacturing Tips:*

How to “Build-Up” Moldings to Create Larger Profiles

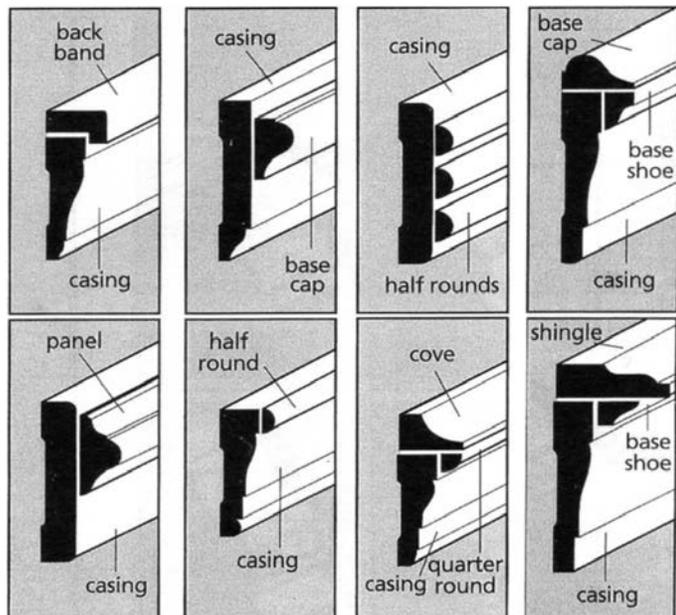

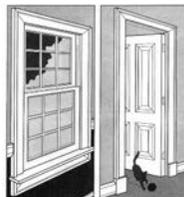

Fireplaces

The use of “built-up” moldings is also an excellent way to highlight or frame your fireplace or add depth and richness to the fireplace mantel.

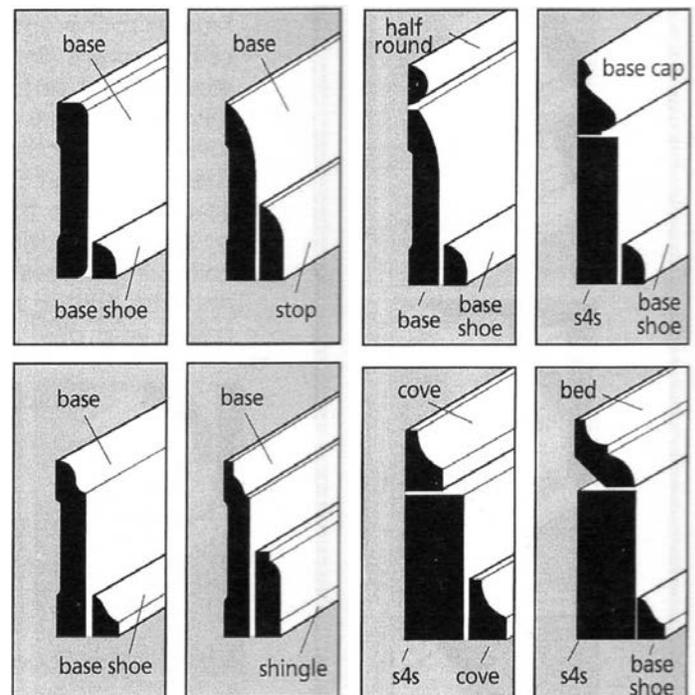

Doors & Windows

The framing of doors and windows is most commonly done with single molding profiles. But by adding other patterns, the basic trim can be easily transformed into a window or door casing of classical depth and beauty. Installing plinth blocks at the bottom of the door casing further enhances the traditional look.

Base

The elaborate look of elegance can even be carried through to base moldings where the wall meets the floor, as illustrated in the following variations.

MOLDING INFORMATION FOR THE HOMEOWNER

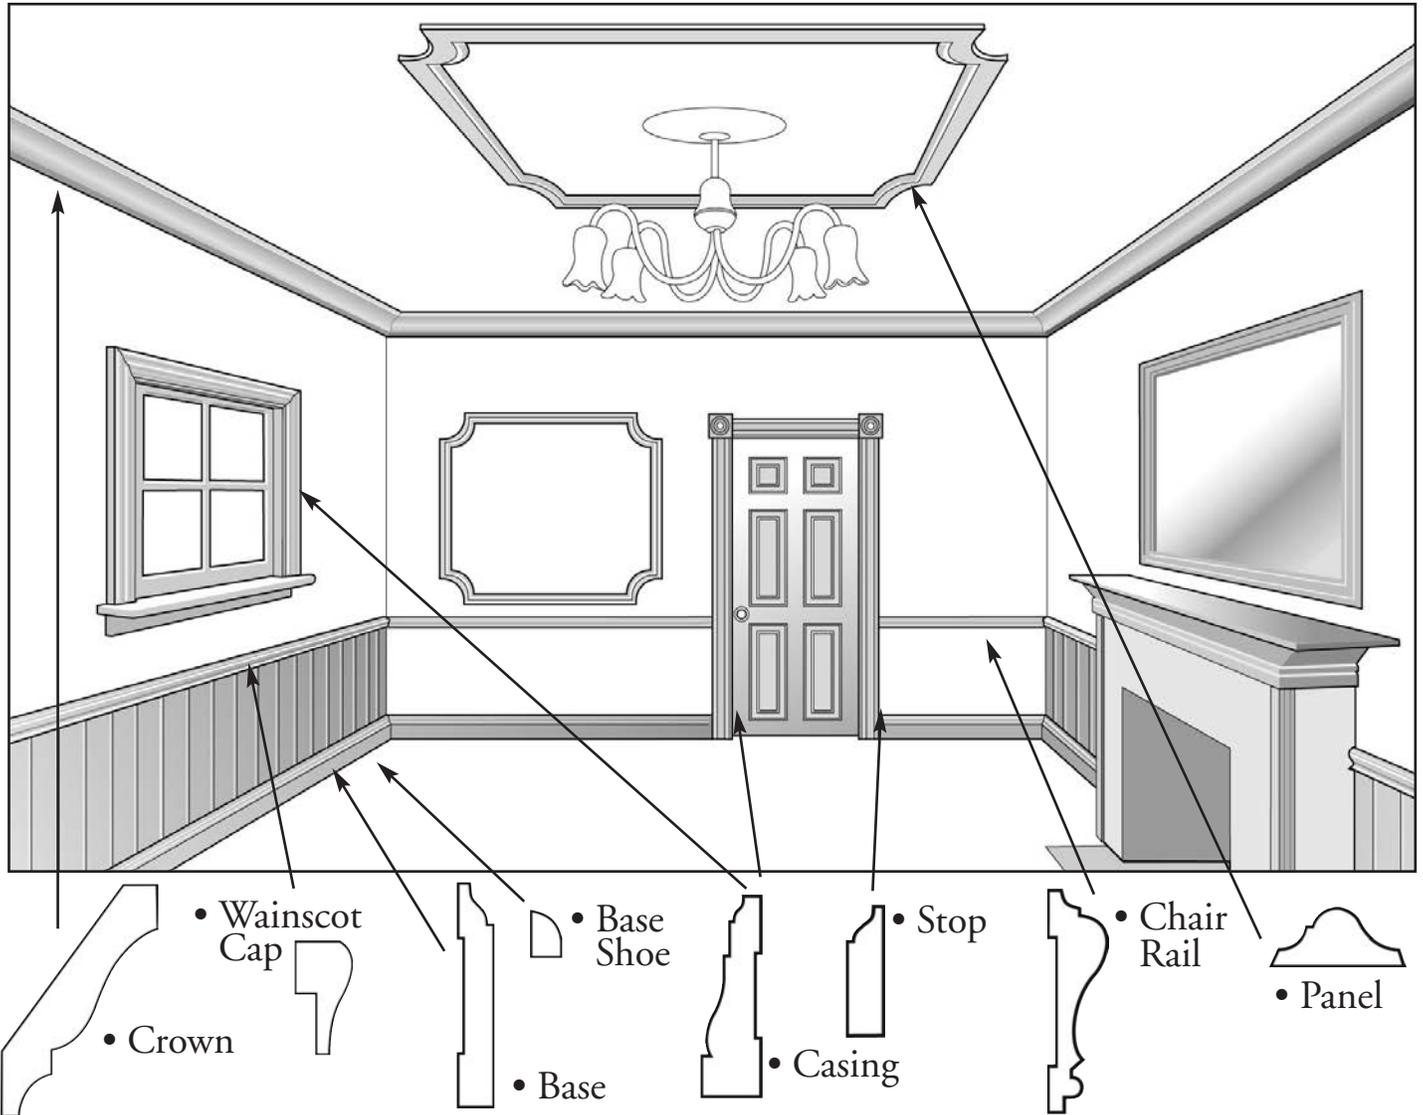

Section II, pages 19 – 123 , is for YOU, the homeowner, decorator, architect, craftsman, artist — anyone who uses wood molding. Here you'll find full-size, full-dimension illustrations of over 600 of our most popular molding patterns. They're organized in categories like Crown Molding, Base Molding, Chair Rail Molding, and many more.

Section II: A Homeowner's guide to molding patterns

CONGRATULATIONS on CHOOSING CUSTOM WOOD MOLDING

Adding WOOD MOLDING to a room is like putting a frame around a picture: the perfect finishing touch that enhances both beauty and value.

The woodworker you are consulting with can make any of the more than 600 molding patterns shown in this book as well as CUSTOM molding patterns, too.

How to use this Sample Book

- Wood molding can be used in many ways to beautify a room. The illustration above shows just some of them.
- Refer to the illustration to find the KIND of molding you seek. (Examples: Crown Molding, or Chair Rail, etc.)
- Browse this book to find additional kinds of molding not shown in the above illustration. (Examples: Quarter Round Molding, Hand Rails, etc.)
- Then go to the section of this Sample Book devoted to that kind of molding and browse through the various PROFILES within that kind of molding. (Example: if you want Cove Molding, see pages 52 – 53 to view 14 different cove molding profiles.)
- All profiles shown in this Sample Book are FULL SIZE in FULL PERSPECTIVE so you can see exactly what they'll look like installed in your home.

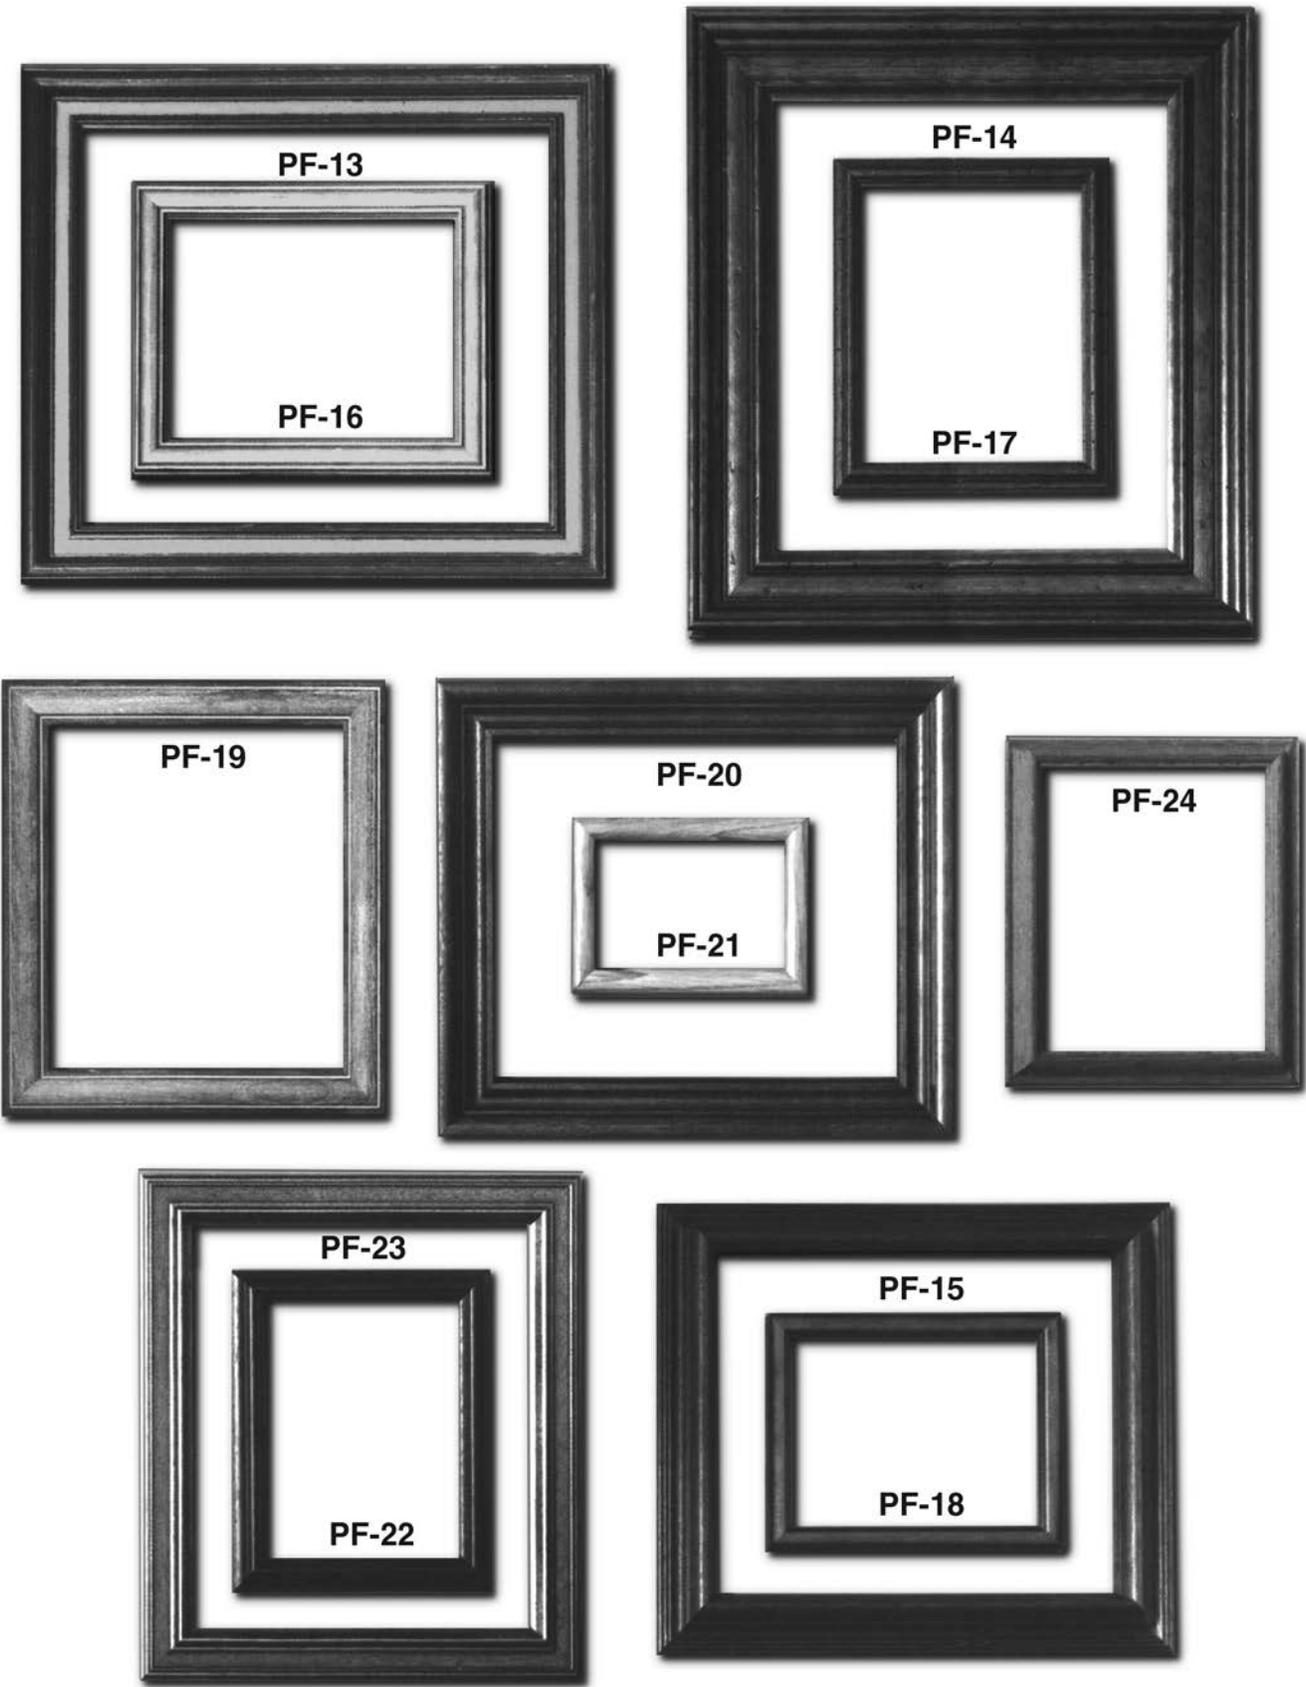

PICTURE FRAME - Woodmaster Molding Patterns

It's hard to find high quality, custom-pattern, real wood picture frames these days. But the woodworker you're consulting has access to over 200 picture frame patterns and is fully prepared to make any pattern you choose for your beautiful artwork, photographs, mirrors, and more.

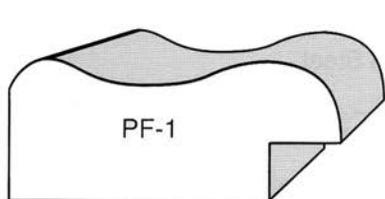

Have a look at the pictures of finished frames on these pages. These are just a FEW SAMPLES of finished frames. The pages that follow show you dozens and dozens of frame profile patterns. Ask your Woodmaster woodworker for advice on which frames will be best for your needs.

CROWN - Woodmaster Molding Patterns

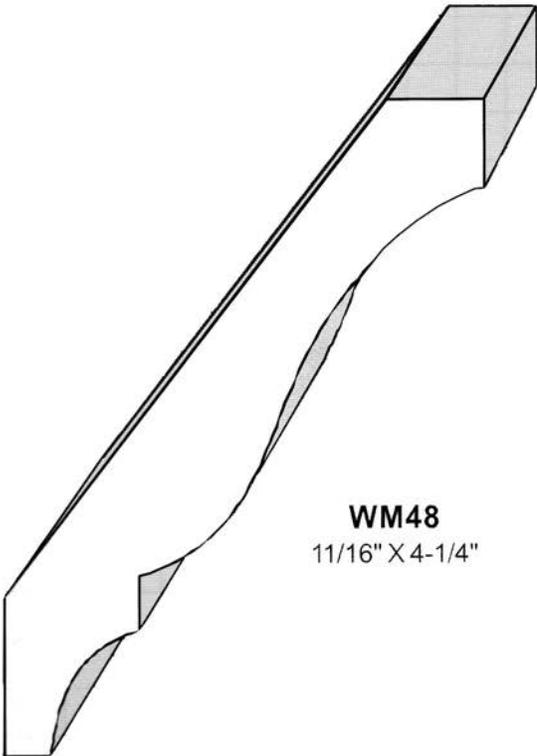

Crown molding gives elegance and a mark of quality to a room. It "crowns" a room at the point where walls meet ceiling, unifying a room while lending handsome detail and a finished quality. The inside corner is "sprung," or cut off to better fit into a 90-degree corner.

CROWN - Woodmaster Molding Patterns

Woodmaster Molding Patterns - BED MOLDING

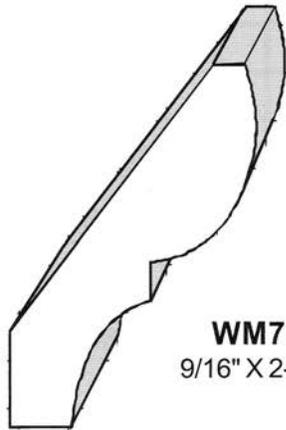

Bed Molding is commonly used like crown molding, where walls meet ceiling. It is smaller in dimension, however, making it well suited for adding a finishing touch to a smaller or simpler room.

QUARTER ROUND - Woodmaster Molding Patterns

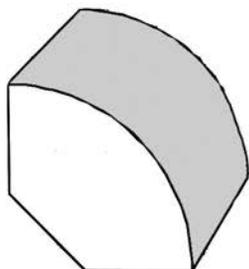

Quarter Round is extremely versatile. It can be used as a base shoe, as an inside corner molding, or to cover any recessed, 90-degree juncture. It's frequently used to cover the line where soffit and siding meet on home exteriors.

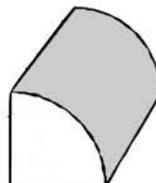

WM103

Woodmaster Molding Patterns - GLASS BEAD

Glass bead is used to hold glazing in place in windows. It's also known as glass stop, cove and bead, putty bead, glazing bead, and staff bead.

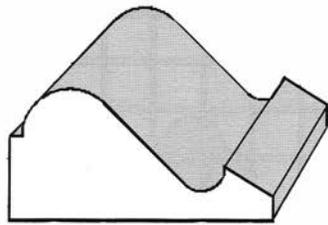

WM147
9/16" X 1/2"

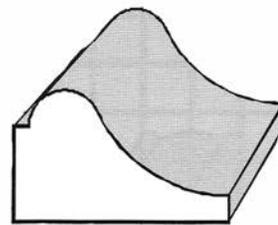

WM148
3/8" X 3/8"

BASE CAP - Woodmaster Molding Patterns

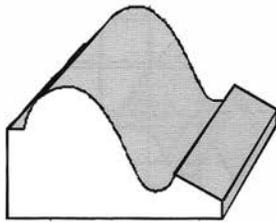

Base Caps are applied at the top of base moldings as a decorative transition between moldings and the wall. They are also useful as panel moldings.

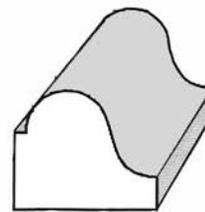

WM163
11/16" X 1-3/8"

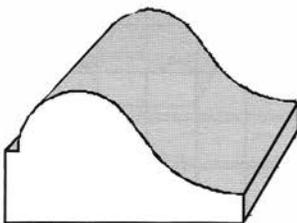

WM167
11/16" X 1-1/8"

WM164
11/16" X 1-1/8"

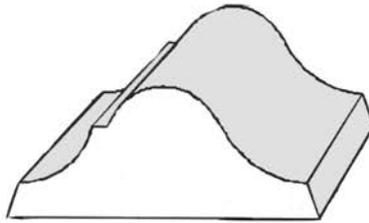

WM172
5/8" X 3/4"

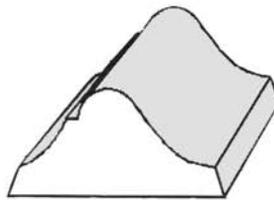

WM166
11/16" X 1-1/4"

Woodmaster Molding Patterns - PANEL

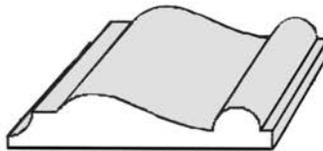

Panel Molding is used for decoration. It was originally used to trim out raised panel wall construction. It can create a paneled effect on walls when used as a frame applied over attractive wall coverings.

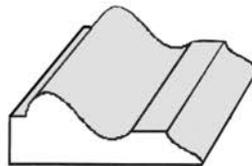

WM182
11/16" X 1-5/8"

WM183
9/16" X 1-1/8"

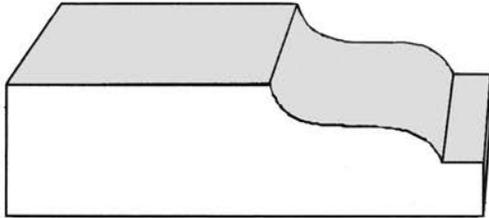

WM185
9/32" X 1-3/8"

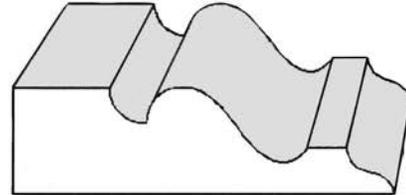

WM186
3/8" X 1"

SHINGLE AND PANEL - Woodmaster Molding Patterns

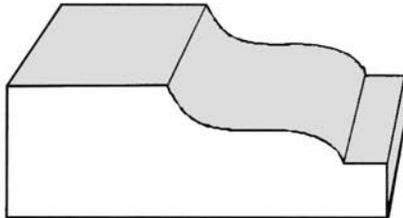

These patterns can be used to create panel molding (see "panel molding knives") or as shingle molding applied to a building's rake and around exterior window frames.

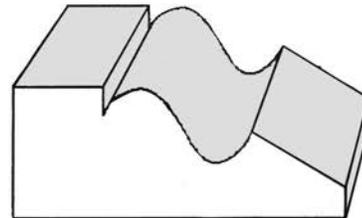

WM207
11/16" X 2-1/2"

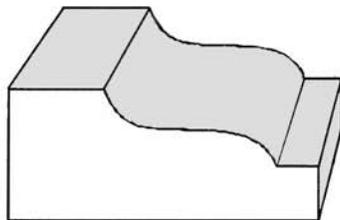

WM213
9/16" X 2"

WM1004
1-15/16" X 2"

Woodworkers:

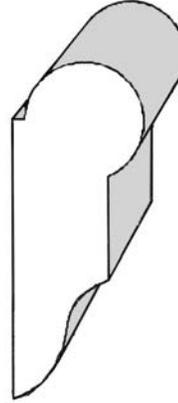

- 2 cuts using the same knife are required to make Hand Rail.

Woodmaster Molding Patterns - PICTURE

Picture mold is a type of crown molding. It mounts high on the wall and lets you hang pictures or mirrors anywhere you like without putting hooks in your walls. Place hooks over the top of the molding, then hang the picture from wires.

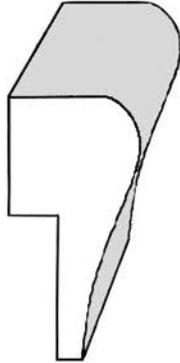

WM273
11/16" X 1-3/4"

WM276
11/16" X 1-3/4"

WAINSCOT/PLYCAP - Woodmaster Molding Patterns

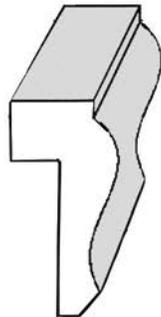

Wainscot / Plycap Moldings are used to finish the exposed end grain of wainscoting or sheets of plywood. It places a handsome cap across the visible edge. Sometimes called a dado cap or wainscot molding.

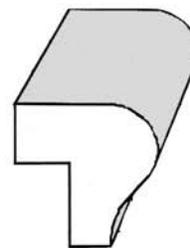

WM290
11/16" X 1-3/8"

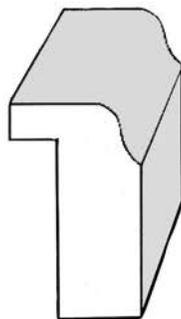

WM295

Woodmaster Molding Patterns - BASE

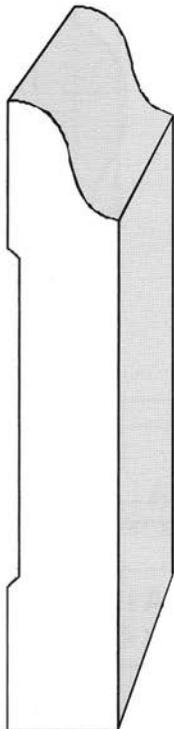

Base molding is applied where walls and floors meet, forming a pleasing visual foundation for the room. It protects the walls from damage from furniture and vacuum cleaners, and neatly hides uneven junctions of floor and wall.

Woodmaster Molding Patterns - BULLNOSE

Bullnose is similar to 1/2 round which would be 1/2 of a circle. Common places you would use bullnose would be on stair tread returns.

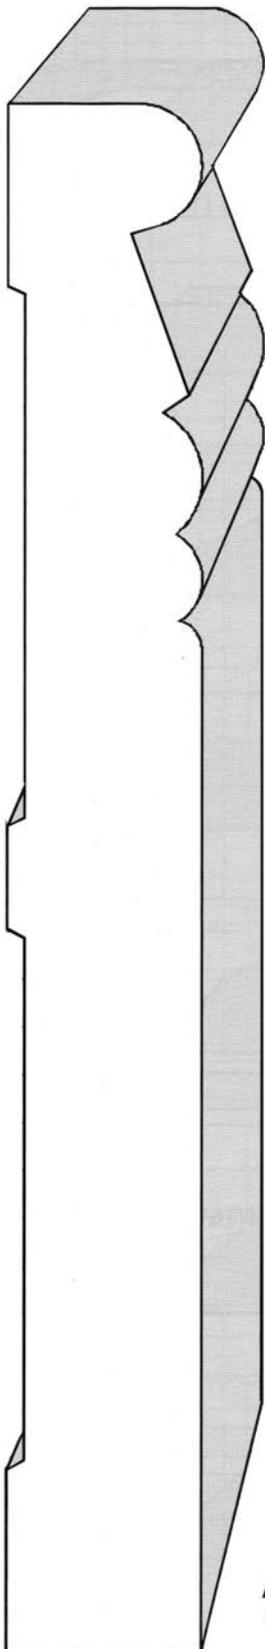

BRICK - Woodmaster Molding Patterns

Brick molding is a strip of material used to close the small gap between a brick wall and the frame of a door or window set into the wall. Hardwood was the traditional material used for brick molding. Because hardwoods are resistant to rot and moisture damage, hardwood brick molding has a long service life, sometimes as long as 50 years. Today, brick molding is often made of softwood with a life of only 15 years. With your Woodmaster, you will be able to supply authentic, long-lasting, hardwood brick mold.

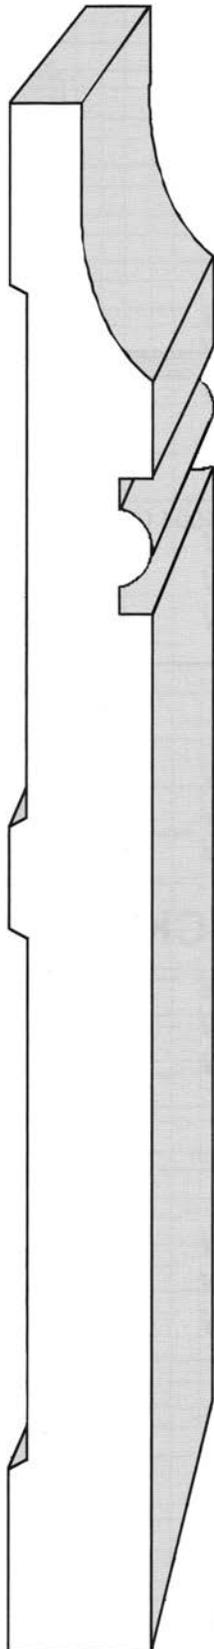

Woodmaster Molding Patterns - PLINTH

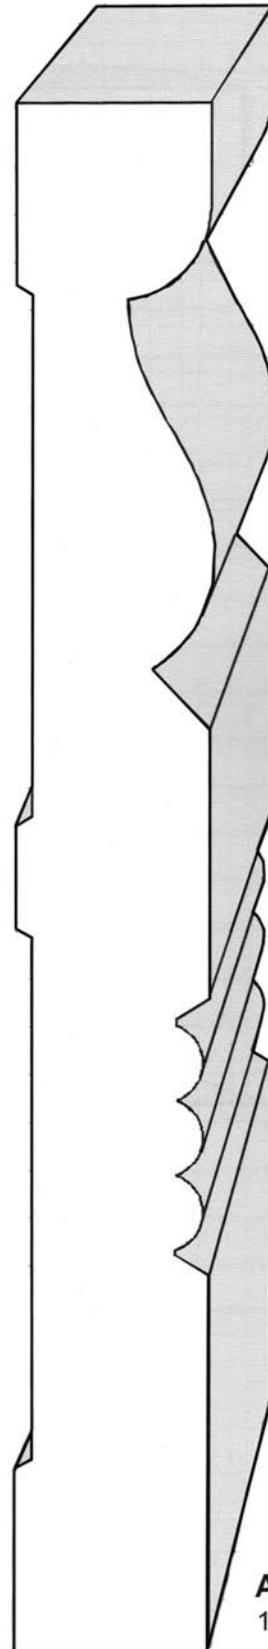

Plinth molding patterns are most often used in combination with matching, square, plinth blocks surrounding a door or window.

LOG CABIN SIDING - Woodmaster Patterns

Now you can quickly and easily produce siding for a rustic, log cabin look. And you can do it even faster with Woodmaster's 3-Side Molding System. This siding has a rounded outside surface for "looks" and a flat inside surface for easy installation. Ship-lap design avoids gaps and shed moisture.

- Matched set of 3 knives must be used for the top profile.
- Manufacturing tips for Log Cabin Siding see p. 13

TONGUE & GROOVE - Woodmaster Patterns

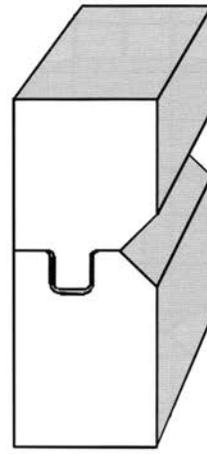

Boards have been edged with a tongue & groove pattern for centuries. It's a strong and simple way to join wood for flooring, paneling, tabletops, etc. Each set of molding knives has two knives; one for the tongue, the other for the groove. The "V" knife set produces a V groove, while the standard set produces a flat surface. For fastest production, consider using Woodmaster's 3-Side Molding System.

BAR RAIL - Woodmaster Patterns

Bar Rail requires two separate knives and two passes to produce the finished pattern. The WM4000 Bar Knife is sold as a set and includes the WM4000T and WM4000B top and bottom knives.

Woodworkers:

- Both Top and Bottom Knives are required to make Bar Rail.

Woodmaster Molding Patterns - PLANTATION LOUVER

Plantation Louver is the go-to pattern for any shutter or louver door, interior or exterior. Match existing louver patterns or design your own.

“DESIGN-YOUR-OWN” KNIFE

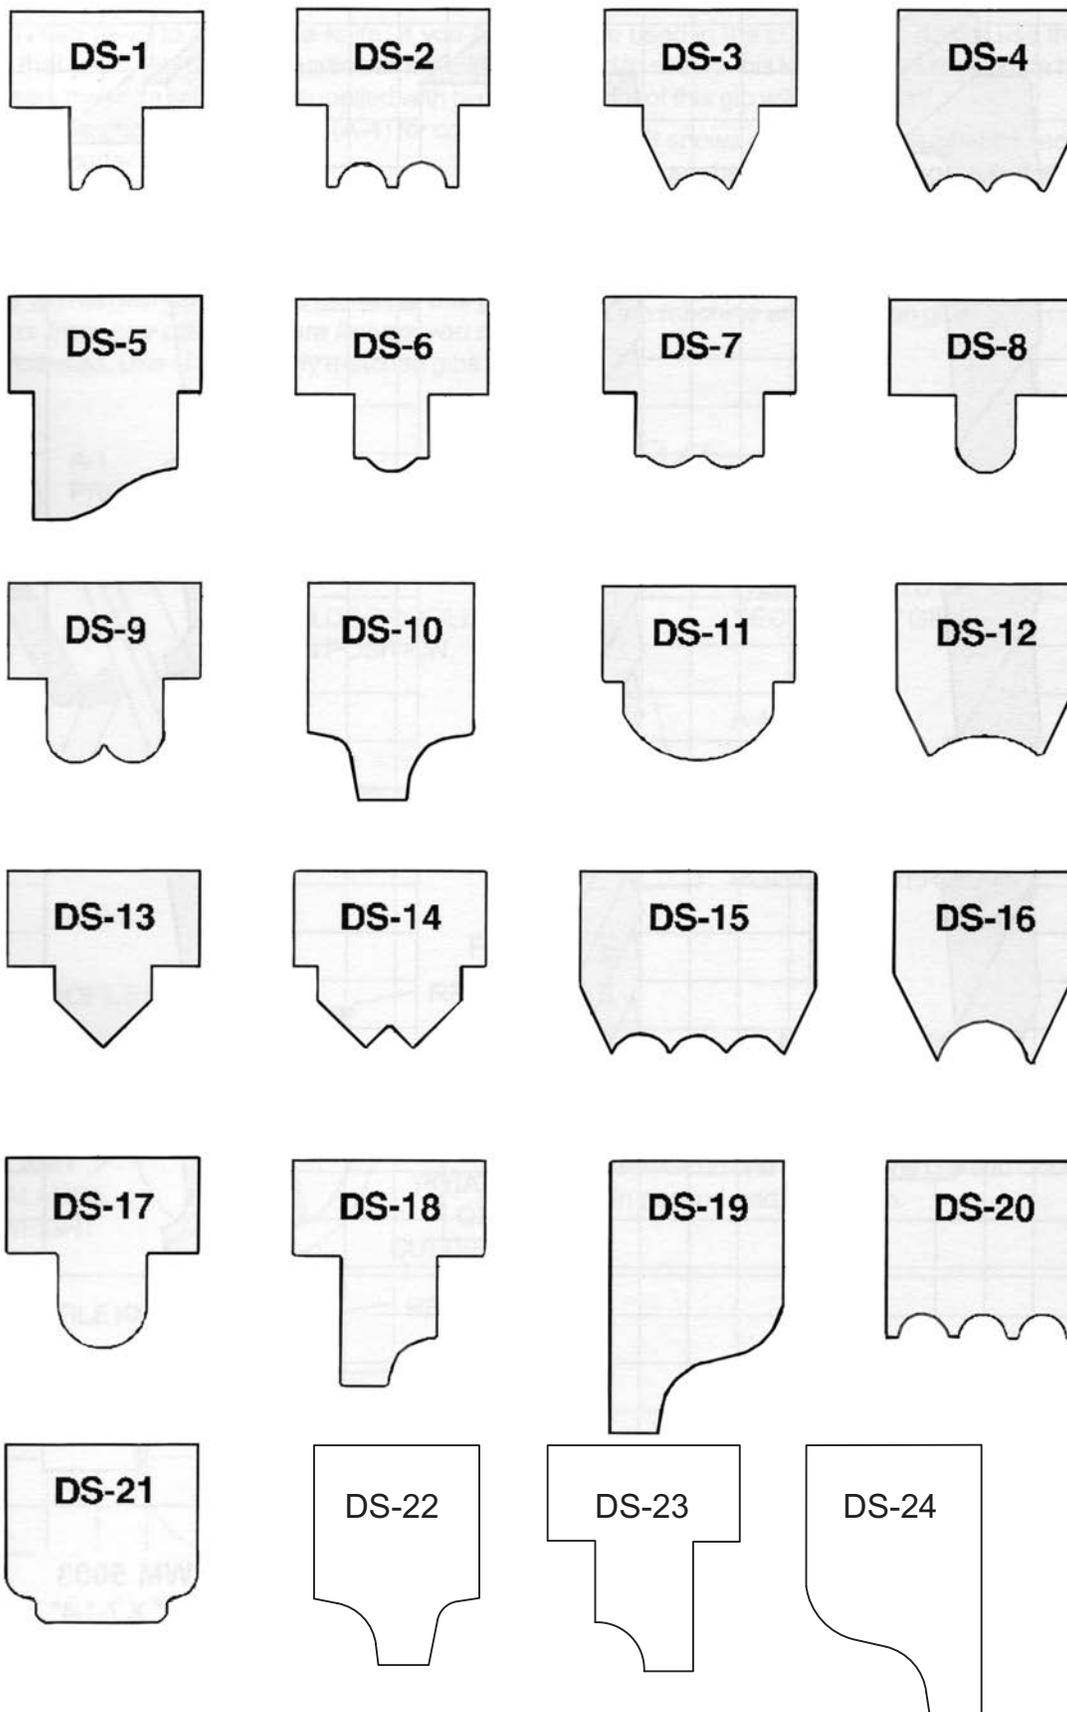

The knives can be used in different combinations to create a wide variety of profiles.

Here are two examples of how these moldings would be made. The examples show the combination of 3 different knives to create a completely custom moulding.

CUSTOM KNIVES - www.woodmastermouldingknives.com

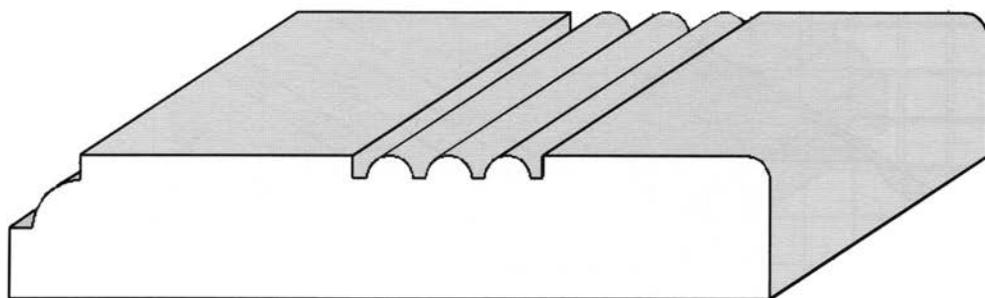

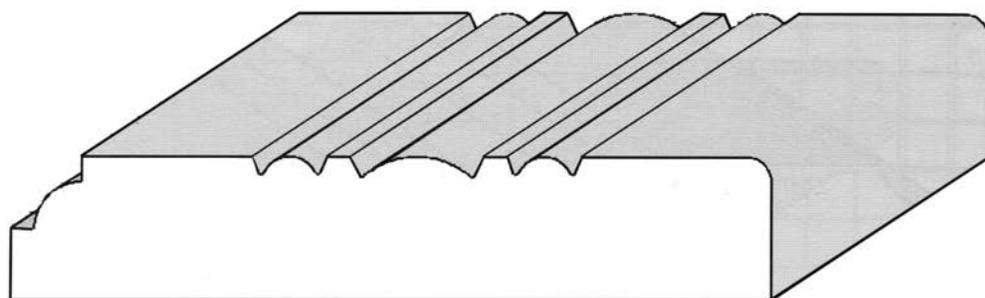

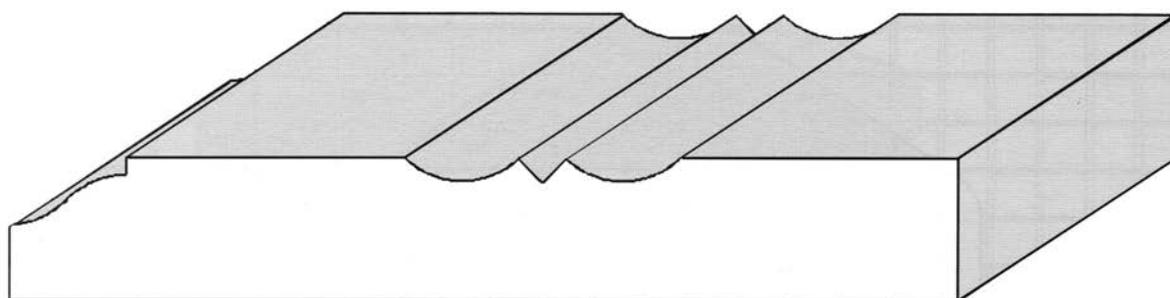

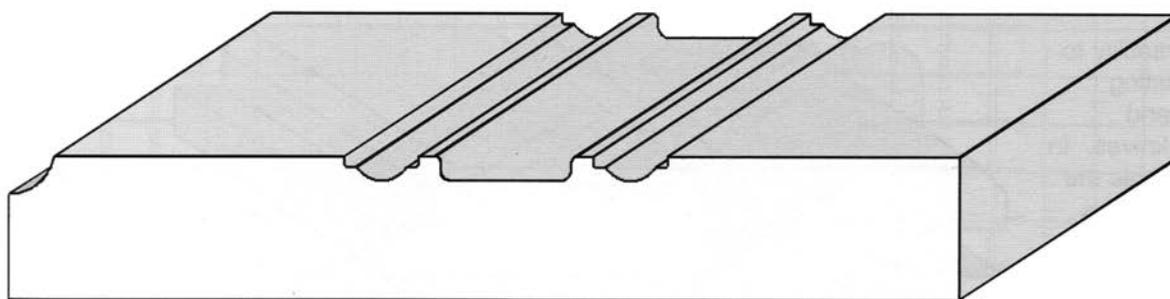

Available knives for creating any of the following examples.

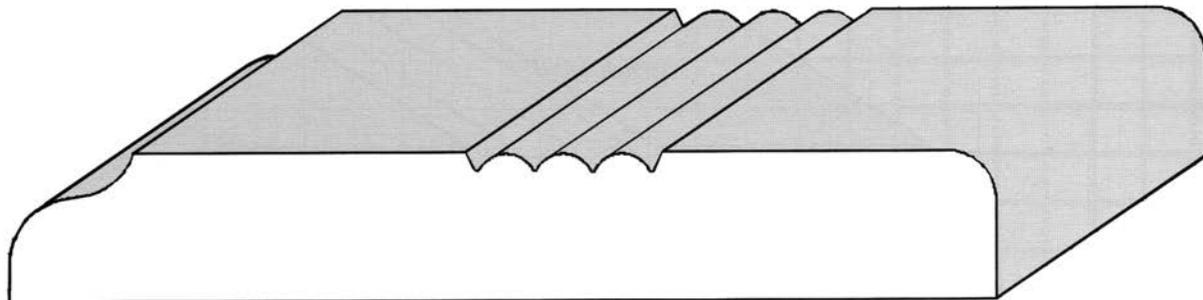

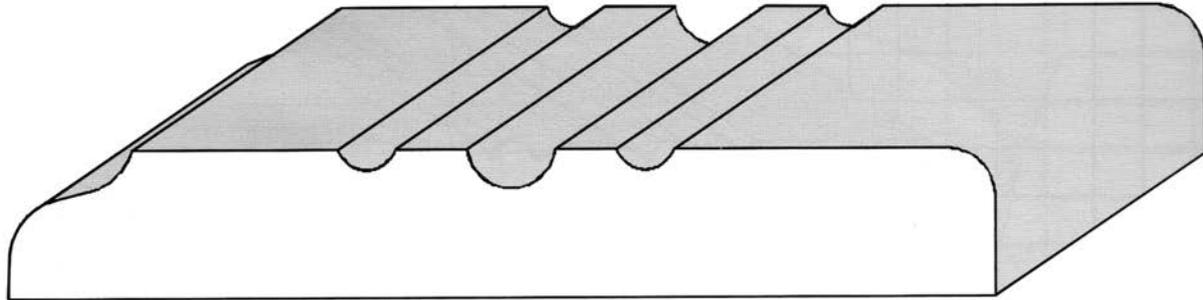

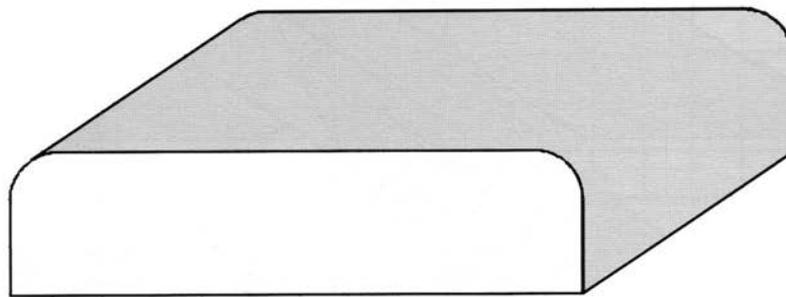

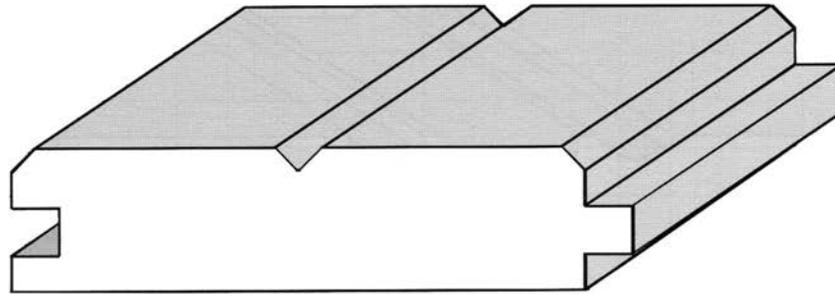

Woodmaster Patterns - "DESIGN-YOUR-OWN" KNIFE

Woodmaster can make knives that let you create virtually ANY molding pattern. You can match new molding or antique patterns that haven't been manufactured in 100 years. Or you can design your own molding patterns — unique in all the world!

For more information on CUSTOM KNIVES, call us TOLL FREE 1-800-821-6651, or visit our CUSTOM KNIFE webpage <http://www.woodmastermoldingknives.com/>

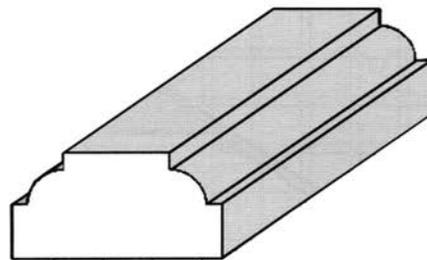

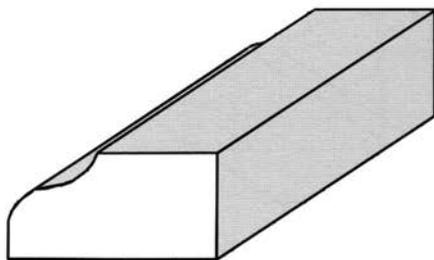

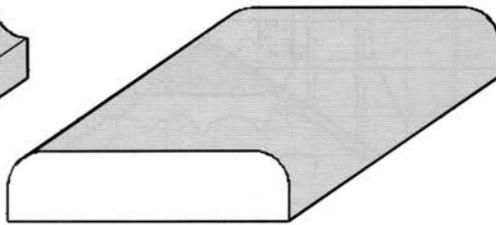

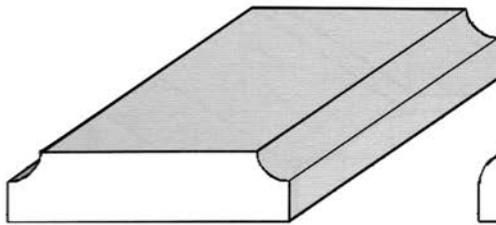

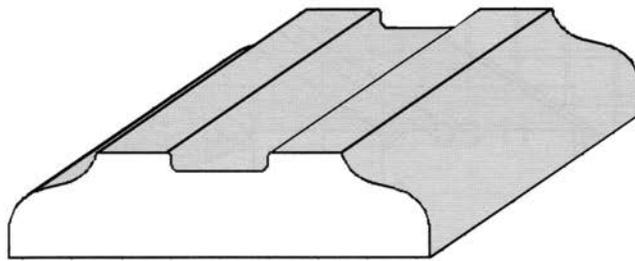

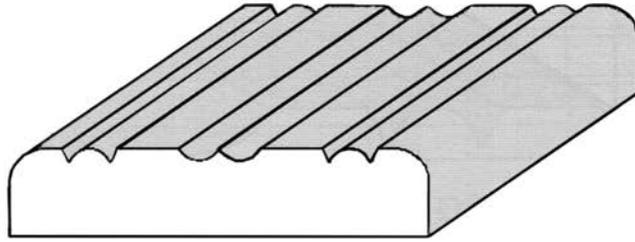

“DESIGN-YOUR-OWN” KNIFE - Woodmaster Patterns

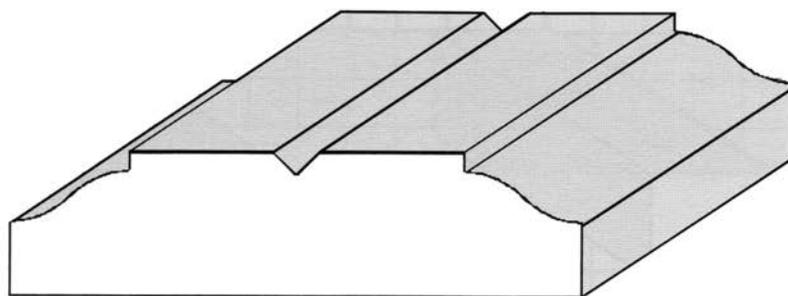

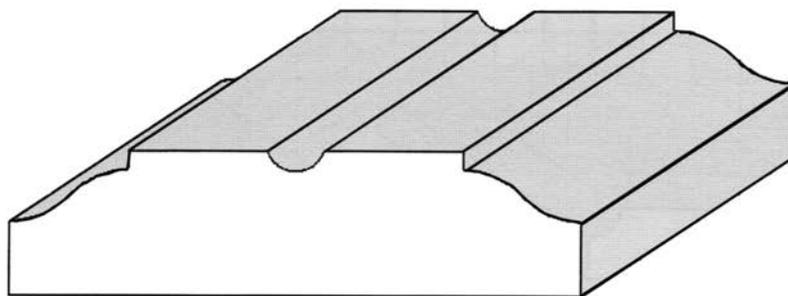

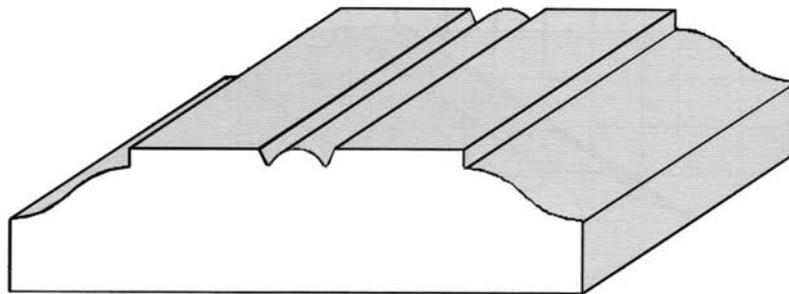

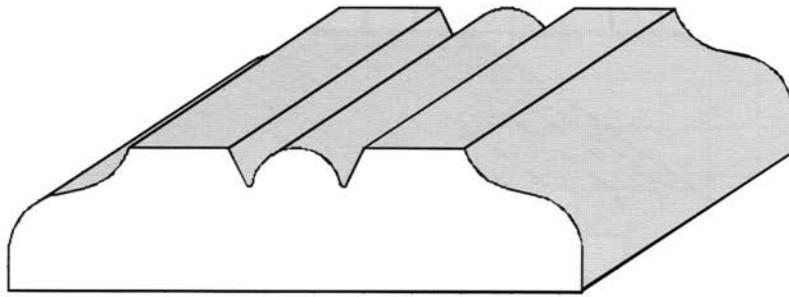

Woodworkers:

- The molding patterns shown are just some of the many profiles you can create using our “Design-Your-Own” Knives.
- Mix and match knives to create an endless variety of unique profiles.

CURVED MOLDING

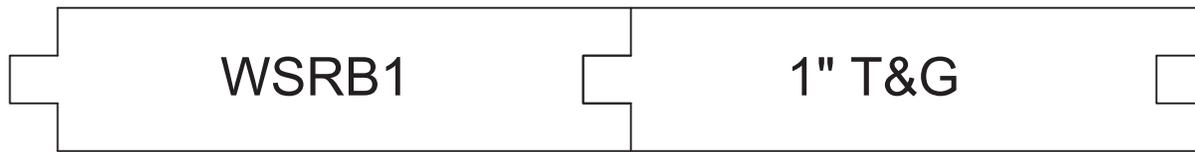

Make High Profit **CURVED** molding easily with Woodmaster's exclusive Curved Molding Jig. No need to "reinvent the wheel" building your own jig. Made in the USA from polypropylene components, precision cut with the latest water-jet technology. Includes a pair of adjustable rails and hardware. Used to make curved or segment topped moldings starting at a 14-inch radius.

This jig fits Woodmaster Models 718 and 725, RBI 15-inch machines and Powermatic 15-inch machines. It measures 15-inches wide by 33-inches long by $\frac{3}{4}$ -inch thick.

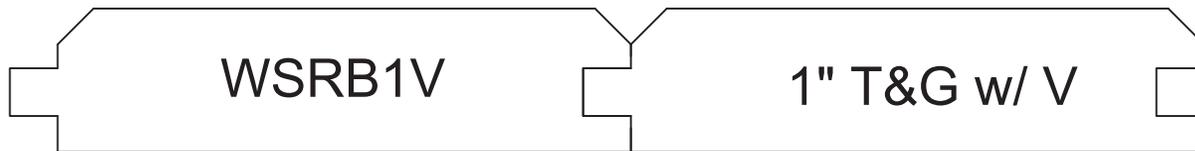

Order online at www.woodmastertools.com or by phone 1-800-821-6651.
